The HERO research program wants to answer crucial questions about the impact of COVID-19 on you, your colleagues, family, and friends.

YOU CAN TAKE PART IN HERO RESEARCH IF YOU ARE:

• A person who works in health care (at a hospital, clinic, nursing home or long-term care facility, emergency medical services, or other setting.)

• Doing any job (environmental services worker, housekeeper, janitor, food services worker, first responder, patient transporter, respiratory therapist, laboratory technician, nurse or nursing assistant, doctor, and many more.)

• ≥ 18 years old

“We just want to keep people safe, and while doing our job to clean and disinfect surfaces to reduce the spread of the virus, we face the risk of COVID-19 ourselves and put our families at risk. By joining the HERO Registry, we can share our experiences on the front lines and participate in research that can make a difference in this crisis.”

Daryl Lawrence, Environmental Services Worker
Vanderbilt University Medical Center

WHY JOIN

Be Part of a Community: Help build a community of workers in health care organized to better understand the effects of the pandemic on the front line.

Participate in Research: Participate in research that can generate evidence to improve the health and well-being of people working in health care.

Learn Together: Provide ideas to help shape future research and learn results.

The Healthcare Worker Exposure Response & Outcomes (HERO) research program is funded by the Patient-Centered Outcomes Research Institute, coordinated by the Duke Clinical Research Institute, and leverages PCORnet®, the National Patient-Centered Clinical Research Network.
